

AHMED ALI AL-KAMAL

+967 770923337 | Ahmaad.website@gmail.com | github.com/12Ahm-webSite | Sana'a, Yemen

PROFESSIONAL SUMMARY

IT graduate with 3+ years of hands-on programming experience (since 2023) building full-stack web applications and mobile apps. Proficient in Django, React, Flutter, and Tailwind CSS. Passionate about clean architecture, user experience, and solving real-world problems through software.

EDUCATION

Bachelor of Information Technology (IT)

University of Modern Sciences (UMS) — Sana'a, Yemen

Expected Graduation: 2026 | Graduation Project: LoomApp — Full-stack Django web platform

International Telecommunications License

General Institute of Telecommunications (GTI) — Sana'a, Yemen

International certification in telecommunications fundamentals

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, Java, C#

Frontend: HTML, CSS, Tailwind CSS, React JS, Flutter

Backend: Django, Django REST Framework, ASP.NET, Laravel

Databases: SQLite, MySQL (via Django ORM)

Tools & Platforms: Git, GitHub, VS Code, Visual Studio 2022, Android Studio

Other: REST APIs, Role-based Authentication & Permissions, Responsive Design

PROJECTS

LoomApp | Django · Python · HTML/CSS · SQLite

- Built a full-stack project management web platform as a graduation project with user authentication, role-based permissions, and profile management.
- Implemented a star-rating system with conditional rendering for profile owners vs. visitors.
- Designed a centralized permissions layer and custom session-based authentication with lockout logic.
- GitHub: github.com/LoomProject/loom

LoomApp Front-End | React JS · JavaScript

- Developed a React-based front-end interface for LoomApp with component-based architecture.
- GitHub: github.com/LoomProject/Front-endReact

Nova | HTML · CSS · JavaScript

- Designed and developed a responsive website with a modern UI layout.
- GitHub: github.com/12Ahm-webSite/Nova

Destini — Branching Story Game | Flutter · Dart · Riverpod

- Built an interactive branching narrative mobile game with 7 different story endings.
- Integrated bilingual support (Arabic/English) and chapter unlock logic using Riverpod state management.
- GitHub: github.com/12Ahm-webSite/destini_starting_master

Internet Speed Meter App | Flutter · Dart · C++

- Developed a mobile application to measure and display real-time internet speed.

- GitHub: github.com/12Ahm-webSite/internet_speed_meter_app

ChatApp | *Django · Python*

- Built a real-time chat application with backend powered by Django.
- GitHub: github.com/12Ahm-webSite/ChatApp

To-Do API | *Django REST Framework · Python*

- Created a RESTful API for a to-do application supporting full CRUD operations and database sync.
- GitHub: github.com/12Ahm-webSite/todo_api-master

Three.js Scene | *JavaScript · Three.js*

- Built an interactive 3D visual scene using Three.js for web-based rendering.
- GitHub: github.com/12Ahm-webSite/threejs
